INSTRUMENTS AND CONTROL SYSTEMS BOOKS

By the Numbers, by Burton Lehrenbaum. Lighthearted look at the story of numbers, numerals, and numbering systems, and of counting, counters, and counting systems. Veeder-Root, 70 Sargeant St., Hartford, Conn. 06102; 146 pp; paper; 75¢.

Radioisotopes for Aerospace, Part 1: Advances and Techniques, edited by John C. Dempsey and Paul Polishuk. Surveys latest developments in detectors, electronics, radioisotopic sources, nondestructive testing, and the application of radioisotopes to measurement problems, together with advanced research and development work. Publication of the Instruments Society of America. Plenum Publishing Corp., 227 W. 17 St., New York, N. Y. 10011; 439 pp; cloth; $37.50.

Computer Logic Circuit Characteristics Tabulation, Third Edition. Covers a total of 4629 types (including 1298 additions) with a total of 245 outline drawings. D.A.T.A. Inc., 32 Lincoln Ave., Orange, N. J. 07050; 382 pp; paper.

Basic Electronics Course: General Fundamentals; Fundamentals of Electronic Tubes; Semiconductor Devices and Molecular Electronics. 3-part self-study course provides general familiarization with the subject matter for those without specific electronics knowledge; suitable as a refresher course for persons with limited electronics background. Westinghouse Electric Corp., Printing Div., Box 398, Trafford, Pa. 15805; 150 pp; paper; $3.00.

Brazing and Brazing Alloys. Bibliography SP-5026 has been prepared as an aid in identifying and appraising literature on brazing and brazing alloys currently contained in NASA Information Systems. National Aeronautics and Space Administration, Clearinghouse for Federal Scientific and Technical Information, Springfield, Va. 22151; 52 pp; paper; $1.00.

Significant Achievements in Satellite Geodesy 1958-1964 (NASA SP-94). One of a series summarizing the progress made in discipline areas covered by the Space Science and Applications Program of the United States. National Aeronautics and Space Administration, U. S. Government Printing Office, Washington, D. C. 20402; 174 pp; paper; 70¢.

Electronic Testing edited by L. L. Farkas. In a how-to-do-it style and employing a minimum of mathematics, describes major types of electronic equipment, discusses their uses, then indicates methods to align them and test their performance. McGraw-Hill Book Co., 330 W. 42 St., New York, N. Y. 10036; 304 pp; cloth; $12.00.

ASTM List of Publications. A comprehensive list of over 500 of the Association's publications covering knowledge of materials, materials evaluation, and the standardization of methods of test and specifications for materials. American Society for Testing Materials, 1916 Race St., Philadelphia, Pa. 19103; 37 pp; paper.

The Theory and Design of Magnetic Amplifiers by E. H. Frost-Smith. Describes transductor theory, shows how transductors fit into the general pattern of amplifying devices, and deals with the application of transductors to magnetic amplifiers. Barnes & Noble Inc., 150 Fifth Ave., New York, N. Y. 10003; 487 pp; paper; $6.75.
